Personal Statement

I am Nicholas Wan, a Business Analytics undergraduate from the National University of Singapore (NUS). I am currently seeking to secure a year-long internship in a start-up in Silicon Valley, USA, from July 2019, as part of the NUS Overseas Colleges Programme. I wish to pursue a career in Healthcare Analytics, as I would like to do work that makes a positive impact on the lives of others. I am also pursuing a minor in Public Health, as I believe the knowledge acquired would be germane to Healthcare Analytics.

About me

I am an independent and motivated individual who is always willing to learn. Last summer, I worked with a group of pharmacy students on an independent project module. My partner and I created a healthcare web application which provides medical advice for users, and thereafter recommends them an active ingredient and shows them a list of products available in Singapore which contain that active ingredient. Our app, Zera is accessible at https://zera.herokuapp.com/home. We are planning to continue working on this project even after the module ends.

Additionally, I have strong leadership qualities, great time-management and organizational skills. Since high school, I have held several leadership positions: The Vice-President of Public Address in high school, as well as an executive committee member for a Programming club in a residential college in NUS, where I organized events to teach non-programming students basic programming language. I believe in applying the knowledge and skills that I have learned to contribute to the community, and I am currently conducting seminars to teach the students in my Residential College how to create their own website and basic knowledge of python.

Work Experiences

Last summer, I also did an internship at Guco Consulting, where I worked as a web developer. I developed and designed websites for four separate companies. Working together with other interns, we developed marketing strategies for these companies. Currently, I am also working on 2 other projects, one of which is to create a website to market unique handcrafted bags, and the other is to create a "dark" website for educational purposes on a television show titled "CrimeWatch" on MediaCorp, Singapore's local television channel.

How can I contribute

I can contribute in various technical areas that require knowledge on data analytics or web development. Furthermore, I am willing and keen to learn new skills that the company requires. I believe that with my experiences, I can contribute significantly and be a great asset to the company.

Weakness

I believe in giving my best for all my work, and thus, may put myself under unnecessary pressure. However, I believe that a certain level of stress is necessary to achieve work of good quality, and I constantly remind myself to regulate the level of stress with recreational activities like badminton or swimming.

All in all, with my experiences, skill sets, strong motivation and other personal attributes, I believe that I can contribute significantly to your company and be a great addition to the company's dynamics.

Education

Aug 2017 - Present National University of Singapore Singapore Bachelor of Science (Honors) in Business Analytics (Course details in Appendix A) Jan 2013 - Dec 2014 **National Junior College** Singapore Singapore-Cambridge General Certificate of Education Advanced Level Subjects: Physics (A), Chemistry (A), Mathematics (A), Economics (A), General Paper (A), Project Work (A) **Work Experience** May 2018 - Aug 2018 **Guco Consulting Group** Singapore Web Developer (Internship) (Testimonial in Appendix B) Responsible for developing websites for 3 different companies Mar 2017 - Apr 2017 Methodology of Studies Singapore Tutor Taught two classes of Secondary 3 Physics students Singapore Mar 2015 - Jan 2017 **Naval Diving Unit** 2nd Sergeant Held a leadership role and oversaw a dive team Operations IC & Logistics IC Scholastic Achievements/Extracurricular Activities Aug 2017 - Present **Scholarship** Singapore NUS Merit Scholarship (National University of Singapore) Aug 2017 - Present **Projects** Singapore Zera Independent Work Project to develop a medical chatbot to provide a preliminary assessment of symptoms, and a web application to provide a platform for the comparison of active ingredients of medication (e.g paracetamol) as well as products (e.g Panadol) Bags by Samarcyra (In Progress) External project to make a website to sell bags. 		Principles of Economics	A+
		Principles of Marketing	Α
		Data Management and Visualisation	A-
		Nobodiness: The Self as Story	A-
		Jr Sem: Family in a Changing Singapore	CS
May – Jul 2018	Year 1/Summer	# Independent Work (Orbital)	In-progress

[#] The **Independent Work (Orbital)** allows year 1 undergraduates from all faculties to form a team of 2 and create any project within 3 months. It is an independent project and, thus, students are required to do their own research and self-study. This allows students to gain an experience of doing a self-study project. I paired up with my friend, a business analytics student, to design a web application.

NUS Grading Scale:

A+ & A (5.0); A- (4.5); B+ (4.0); B (3.5); B- (3.0); C+ (2.5); C (2.0); D+ (1.5); D (1.0); F (0)

S = Satisfactory; U = Unsatisfactory

CS = Completed Satisfactorily; CU = Completed Unsatisfactorily

EXE = Exempted; IC = Incomplete; IP = In Progress; W = Withdrawn
